### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention, of which the applicant is directed to select one of:

1. A multi-channel echo canceller system/method where the input multi-channel audio signals are reproduced by said loudspeakers without lowering the correlation of the signals; depicted in figures 1, 12, 17 and 21; recited in claim 49
2. A multi-channel echo canceller system/method where the input multi-channel audio signals are reproduced by said loudspeakers with lowering the correlation of the signals; depicted in figures 9, 10, 11, 13-16, 18-20, 22, and 23; recited in claims 41-48, 50 and 51

Upon selection of one of the above species, the applicant is further directed to select one of the following subspecies:

- A. A multi-channel echo canceller system/method where the input audio signals are filtered separately and the microphone signals are echo cancelled separately; depicted in figures 1, 9, 10 and 11; recited in claims 11-21
- B. A multi-channel echo canceller system/method where the input audio signals are filtered in combination and the microphone signals are echo cancelled separately; depicted in figures 12-15; recited in claims 22-27

- C. A multi-channel echo canceller system/method where the input audio signals are filtered separately and the microphone signals are echo cancelled in combination; depicted in figures 16-20; recited in claims 28-31
- D. A multi-channel echo canceller system/method where the input audio signals are filtered in combination and the microphone signals are echo cancelled in combination; depicted in figures 20-23; recited in claims 32-35

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and subspecies for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-10, 36-40 and 52 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species-subspecies (**1A, 1B, 1C, 1D, 2A, 2B, 2C or 2D**) that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
